

Here's your roadmap for the year!

Every class session has four important sections. You should read about the details for each using the main menu at the top of this webpage.

- **Week Overview** (): This page overviews the weeks
- **Lectures** (): This page is for lectures
- **Labs** (): This page is about labs
- **Extras** (): This page is about Extras
- **Coursework** (): This page contains the instructions for either the session exercise (1–3 brief tasks), or for the two mini projects and final project. **Assignments are due by 11:59 PM on the day they're listed.**
- **Mini-Diss** (): This page contains an interactive lesson that teaches you the principles and code you need to know. Go through these after doing the content.

tl;dr: You should follow this general process each week:

- Check out the overview () page and do any thinking/reading/prep suggested if you have the chance
- Come to the lecture () page
- Attend the lab () and get cracking
- Complete the coursework () on time
- Use the plentiful Mini-Diss resources () to help you smash the MD
- Use the extras () to keep you in tip top spirit

Weekly schedule

Coursework

Here are some assessment items

Homework

2 hrs per week

Labs

2 hrs per week

Exams

2 hrs face to face
