(**greenspan?**) 2009 model is a cornerstone in gullibility research and even in-spired the creation of the only existing gullibility scale (Teunisse et al., 2020). But let's not mince words: the model lacks empirical backbone, having never been subjected to validity or reliability tests. Greenspan identifies four key play-ers in the drama of gullibility: situation, cognition, personality, and state. Sit-uation is all about the deceiver's skill in crafting a compelling tale. Cognition tackles the victim's mental state—think cognitive load or mood. State zeroes in

on the victim's physical and mental readiness to critically engage, while person-ality zooms in on trust and agreeableness.

Greenspan's 2009 model is a cornerstone in gullibility research and even in-spired the creation of the only existing gullibility scale (Teunisse et al., 2020).

⬚ Content

This is what will be discussed today.

Always good to explain the agenda so audience can have clear expectations.

Therse are animated bullet points:

- ⬚ Point one
- ⬚ Point two
- ⬚ Point three

...You ca

Fragments

Incremental text display and animation with fragments:

Fade in

Slide up while fading in

Slide left while fading in

Fade in then semi out

Slide Backgrounds

Set the `background` attribute on a slide to change the background color (all CSS color formats are supported).

Different background transitions are available via the `background-transition` option.

Learn more: Slide Backgrounds

Media Backgrounds

You can also use the following as a slide background:

- An image: `background-image`
- A video: `background-video`
- An iframe: `background-iframe`
