> Some wild callout

another page

Here are my tests of callout blocks.

See the [documentation](#).

> ℹ️ Note
>
> Note that there are five types of callouts, including: `note`, `warning`, `important`, `tip`, and `caution`.

> ⚠️ Warning
>
> Don't do that! simple appearance.

> ❗ Important
>
> Do do this!

continued

> 💡 Tip With Caption
>
> This is an example of a callout with a caption.

> 🔥 Expand To Learn About Collapse
>
> This is an example of a 'folded' caution callout that can be expanded by the user. You can use `collapse="true"` to collapse it by default or `collapse="false"` to make a collapsible callout that is expanded by default.

> 🔥 Don't do that! simple appearance.

> Don't do that! minimal appearance.

clean templates

Example slide

This is a subtitle

Here we have some text that may run over several lines of the slide frame, depending on how long it is.

- first item
    - A sub item

Next, we'll brief review some theme-specific components.

- Note that *all* of the standard Reveal.js features can be used with this theme, even if we don't highlight them here.

Additional theme classes

Some extra things you can do with the clean theme

Special classes for emphasis

- `.alert` class for default emphasis, e.g. important note.

- `.fg` class for custom colour, e.g. important note.
- `.bg` class for custom background, e.g. important note.

Cross-references

- `.button` class provides a Beamer-like button, e.g. Summary

Want more?

slide

text - div cleft

text - div cright

See our longer demo slides

We've deliberarely kept this template lean, to get you up and running as fast as possible.

We provide a separate demo template, with more examples for integrating code, tables, figures, etc.

- See the live demo slides here.

Summary

A minimal and elegant presentation theme

The Quarto reveal.js clean theme aims to be a minimal and elegant presention theme.

Install the theme.

```
quarto install extension grantmcdermott/quarto-revealjs-clean
```

Use this lean template.

```
quarto use template grantmcdermott/quarto-revealjs-clean
```

Use the longer demo template.

```
quarto use template grantmcdermott/quarto-revealjs-clean-demo
```

Bullet point list

Unordered

- Item A
- Item B
- Item C

Ordered

1. Item 1
2. Item 2
3. Item 3

Incremental list

- Item 1
- Item 2
- Item 3

Equations

Write mathematical symbols and equations using Latex.

puppies

Themes

Customize the appearance of the slides using

- Built-in Reveal theme
- Modify built-in theme using Sass
    - Variant of CSS that supports variables and other features
- Create custom thing using Sass

Specify the theme and/or Sass file (.scss) in the YAML

cleft cright

Here's some good old text

cleft stuff Gullibility has started to be studied due to the fact it gives valuable insights into human behaviour, cognition, and decision-making processes. Gullibility study has practical applications within different fields, such as psychology, sociology, marketing, and public policy. The study of factors affecting gullibility has also been conducted to create a precise psychological profile of individuals prone to being gullible. Therefore, emotional intelligence (Baker et al., 2013; Young et al., 2015), social intelligence (Hart et al., 2021; Teunisse et al., 2020) trust (Baker et al., 2013; Hamby et al., 2021; Rotter, 1967; Rotter, 1980; Teunisse et al., 2020: Yamagishi et al., 1999), personality factors (Begue et al., 2015; George et al., 2020; Gore et al., 2012; Peace et al., 2011; Teunisse et al., 2020), facial representation (Jaeger & Meral, 2022) and overall poor decision-making mechanisms have been included. The benefit of studying gullibility lies in the need to determine and safeguard individuals who are likely to fall for deceptive speech, online as well as face to face.

cright stuff

trust (Baker et al., 2013; Hamby et al., 2021; Rotter, 1967; Rotter, 1980; Teunisse et al., 2020: Yamagishi et al., 1999), personality factors (Begue et al., 2015; George et al., 2020; Gore et al., 2012; Peace et al., 2011; Teunisse et al., 2020), facial representation (Jaeger & Meral, 2022) and overall poor decision-making mechanisms have been included. The benefit of studying gullibility lies in the need to determine and safeguard individuals who are likely to fall for deceptive speech, online as well as face to face.

Bird, G., Silani, G., Brindley, R., White, S., Frith, U., & Singer, T. (2010). Empathic brain responses in insula are modulated by levels of alexithymia but not autism. *Brain*, *133*(5), 1515–1525. https://doi.org/10.1093/brain/awq060
